

The “Remote Coach” session is a great choice for leaders who believe their music team has room to improve and would like professional guidance at minimal cost. Rather than an onsite session, More Than Music Mentor will deliver a unique, personalized critique remotely, using uploaded video recordings of your team of musicians and singers playing your songs!

More Than Music Mentor will:

- give a FREE 30 minute preliminary video chat or phone call with the team leader to get the ball rolling,
- expertly scrutinize your teams song videos,
- give a one hour face to face video conference critique with the team leader, and
- provide a written report with specific actionable recommendations.

Equipped with this specialized information, your team will have clearly explained items to change and improve that are within their reach. As they work through the listed items, their sound is certain to improve, as will your congregation’s level of participation and fulfillment in worship through songs.

Once you’ve had your 30 minute preliminary video chat, there’s just a little legwork at your end. If you choose to proceed with your Remote Coach session, follow these steps:

1. Register for your Remote Coach session by paying the US\$500 fee. (*Paypal, Square or check*)
2. Create video recordings of your band playing 1 to 3 songs (either during a service or a rehearsal setting) and upload them to YouTube or a similar video hosting website (publish as unlisted). And PLEASE make sure you read and follow our *Tips for getting suitable video* instructions below.
3. Fill out the Band Profile form, including the URLs for your video(s) and the names and roles of each team member in the video.
4. File share and/or Email the following to info@grantnorsworthy.com :
 - completed band profile form
 - the lyric/song charts (PDF) and
 - sound recordings (mp3 or YouTube links) that the band used in their personal preparation of the videos songs (if applicable).
5. Wait for a submission confirmation email - usually within 48 hrs. We’ll make sure that we have everything we need to proceed. Then we’ll schedule your Remote Coach critique video conference - typically within two to three weeks of your submission.

Tips for getting suitable video for Remote Coach:

- *Use the same team for each video.*
- *Use a smart phone or other camera capable of good quality video and sound recording.*
- *Record during a rehearsal OR a congregational setting, from the perspective of the congregation.*
- *But make sure your team can be heard as clearly as possible. The microphone on your camera will usually do the job, but a direct audio line from your mixing console would be even better.*
- *If audio is recorded by microphone(s), make sure there is no distracting sound nearby (such as crying babies, a fan or the person with the camera singing!).*
- *Keep the camera steady! Please use a tripod or other stand. A static frame that tightly captures the whole band is better than an artistic, wandering view.*
